

## Features of PhoneWala.com

### PC-to-Phone Service

[Phonewala.com](http://Phonewala.com) is an Internet telephony service. It connects your PC to any telephone (fixed line as well as mobile) around the world. The calls are established using the IP technology. With this service you can now call your friends and family anywhere around the world, at a fraction of regular ISD charges. The voice transmission is of very high quality.

Net4 in association with Trak Online Net India Pvt Ltd, a licensed Internet Telephony Service Provider (ITSP), pioneered this technology in India for the retail market. Phonewala.com is backed by the reliability and technology competence associated with Net4.

What will I need to make calls from my PC?
